 L-ACOUSTICS

HYRISS, short for Hyper-Real Immersive Sound Space, is the culmination of a lifetime dedicated to the beauty and richness of sound—a journey of one man, one team, one company, tirelessly working together day by day to refine the human sensory perception of sound. Our sense of hearing is not only the anchor to our reality but also the gateway to art and imagination.

— Christian Heil

Sound, an integral part of your life.

Control the ambiance to enhance concentration, enter a serene natural sound space for deep relaxation, or discover your favorite music as if in a studio.

Your space effortlessly transforms into a concert hall, sports stadium, or cinema, erasing the need for dedicated media rooms.

Push entertainment beyond traditional limits: Sing your heart out in your personal karaoke lounge or dance the night away in your private nightclub, all from the comfort of your space.

With HYRISS, live in the extraordinary sound space you've always dreamed of—where every day is an auditory masterpiece, and the space is a temple for the ears.

A sophisticated living room interior at night. The room features a high ceiling with recessed lighting and a large, ornate crystal chandelier. The furniture includes a light-colored sofa, a dark leather armchair, and a grand piano. Several floor lamps with cylindrical shades provide ambient lighting. The overall atmosphere is warm and elegant.

Redefining Audio Excellence

HYRISS revolutionizes the way you experience sound in your environment. It features a high-resolution, three-dimensional network of loudspeakers that provide exceptional listening conditions and absolute acoustic comfort. The system's strength lies in consolidating all the loudspeakers of the installation to ensure precise, individual, and focused functionality or offering a multi-dimensional, immersive, and spatial experience. HYRISS allows you to adjust sound intimacy and immersion, presenting each scenario in unparalleled quality.

The system provides predefined scenarios tailored to your primary uses and preferences. You can also record new scenarios to match your specific needs at any moment. For example, you might listen to the news from a screen on the opposite side of the room, use the loudspeaker closest to you, enhance your voice for a presentation, or choose specific loudspeakers for listening to stereo music. Numerous sound playback formats are supported, from monaural and stereo to Dolby Atmos and beyond.

HYRISS goes beyond hardware, software, and traditional sound formats; it offers a unique solution for architectural spaces. It transforms your favorite music by giving it motion and spatial qualities that extend far beyond its original format. This enhancement allows you to make a simple stereo recording that envelops you entirely, giving each element its own space as if it were on a concert stage.

Moreover, HYRISS adapts the acoustics of your space to fit various activities—whether singing, playing an instrument, cheering while watching a sports event, or dancing in a club—creating dynamic and engaging experiences unmatched by other systems.

Professional Technologies for an Unparalleled Sound Experience

HYRISS leverages acclaimed L-Acoustics professional technologies to deliver a supreme sound experience that is custom-tailored for every application within your space. Experience sound as it was meant to be heard, in all its clarity and depth.

L-ISA

L-ISA technology, adopted by artists like Adele, transforms traditional soundscapes by precisely positioning instruments in space, mimicking live concert settings. This innovation enhances music and sound, ensuring dynamic qualities and harmonious relationships of instruments are preserved for every listener. Vocals become more intimate, and orchestras more grand, creating spectacular auditory experiences. HYRISS integrates this technology, forming the foundation of its innovative audio tools.

Ambiance

With a touch of a button, shift from a private cinema's crisp acoustics to the rich atmosphere of a concert hall. Ambiance immerses you in the perfect acoustic environment for recorded, broadcast, or live music.

Elevate your auditory experience with Ambiance, part of HYRISS, where professional-grade acoustics meet convenience. Ambiance uses state-of-the-art sensing microphones, the advanced L-ISA II Processor, and dynamic HYRISS loudspeakers to transform any room's acoustics.

ANIMA

HYRISS uses technologies that transform traditional stereo recordings into dynamic, immersive soundscapes, akin to a live nightclub. It precisely separates instruments, placing each in its own three-dimensional space.

ANIMA, a suite of creative technologies, elevates existing music into extraordinary experiences. Using advanced algorithms and machine learning in the L-ISA II Processor, even simple tracks become thrilling concert experiences, making every listen premium

Uncompromising Components for Flawless Sound

Concert Quality Loudspeakers - Experience the Power of a Concert Hall

Premium professional loudspeakers and subwoofers are installed seamlessly to mimic the unmatched performance, clarity, and power of a live concert setting.

Electronics and Software - Precision Engineering with Power and Control

HYRISS is powered by high-performance L-Acoustics processed amplifiers and the revolutionary L-ISA II Processor. From the subtlest details to booming concert volumes, the system ensures crystal-clear sound with robust, professional-grade, distortion-free performance. Experience the same sophisticated sound technology used in the world's leading concert venues.

Customized Service - Tailored Solutions by Certified Experts

Each HYRISS installation is a masterpiece crafted by certified experts. We collaborate with you to define the desired experiences, operational conditions, and budget, ensuring a personalized solution. Enjoy elite-level service, the same as the world's top musical performers.

A sophisticated lounge interior featuring a bar with a bartender, modern seating, and ambient lighting. The space is elegantly furnished with a dark bar, light-colored sofas, and various lamps. A chandelier hangs from the ceiling, and a window shows a view of the city at night.

Experience the future of sound with HYRISS. Superior audio technology and seamless design merge to create the ultimate auditory environment. From everyday living to grand entertaining,

HYRISS tailors every note to perfection, transforming your space into the most coveted place. Elevate your audio experience with HYRISS—the pinnacle of sound sophistication, designed to resonate with every aspect of your life.

At L-Acoustics, we transform ordinary spaces, elevating every encounter into a profound auditory experience. Since 1984, our established company has been at the forefront of audio innovation, equipping countless world-renowned festivals, global tours, and prestigious concert halls. Our expertise ensures a seamless fusion of artistic vision and sonic performance, stimulating unforgettable moments of shared joy and connection between artists and audiences.

Our large team of sound, design, research, engineering, and craftsmanship experts delve into the nuances of sound behavior – its propagation, analysis, and perception. This deep understanding positions us as leaders in the art of sound, allowing us to enhance both professional venues and private spaces where sound is as crucial an element as visual design.
