

H Y R I S S Hyperreal Immersive Sound Spaces

One Space. Endless Experiences.

HYRISS, short for Hyperreal Immersive Sound Space, is the culmination of a lifetime dedicated to the beauty and richness of sound — a journey of one man, one team, one company, tirelessly working together day by day to refine the human sensory perception of sound. Our sense of hearing is the anchor to our reality and the gateway to art and imagination.

— Dr. Christian Heil
President & Founder L-Acoustics

Sound: An Integral Part of Your Life

We live in a world saturated with images and flooded with noise. Sound begins with silence.

Control the ambience to enhance concentration, enter a serene natural sound space for deep relaxation, or discover your favorite music as if in a studio.

Your space effortlessly transforms into a concert hall, sports stadium, or cinema, erasing the need for dedicated media rooms.

Push entertainment beyond traditional limits: Sing your heart out in your personal karaoke lounge or dance the night away in your private nightclub, all from the comfort of your space.

With HYRISS, you can live in the most extraordinary sound space you can imagine—where every day is an auditory masterpiece, and the space is a temple for the ears.

HYRISS One Space. Endless Experiences.

Sound Experiences Reinvented

Experience audio tailored to your every need, from predefined scenarios to custom settings you create on the fly. It features a high-resolution, three-dimensional network of loudspeakers, allowing you to watch the news from across the room while hearing it clearly from nearby speakers, enhance your voice for presentations, or immerse yourself in music through selected speakers. Supporting formats from mono to Dolby Atmos® and beyond, HYRISS adapts to any situation, letting you craft your ideal sound environment with ease.

But HYRISS goes beyond traditional hardware and software. It transforms your favorite music, giving it motion and spatial qualities that extend far beyond its original format. Imagine a simple stereo recording enveloping you entirely, each element occupying its own space as if on a concert stage.

HYRISS dynamically adapts your space's acoustics for various activities—be it singing, playing an instrument, or cheering during a sports event—creating unparalleled, engaging experiences. Whether for work or leisure, HYRISS delivers audio perfectly attuned to your life, starting with silence and ending with your personal symphony.

The Magic Behind HYRISS

HYRISS leverages acclaimed L-Acoustics professional technologies to deliver a supreme sound experience custom-tailored for every application within your space. Experience sound as it was meant to be heard, in all its clarity and depth.

L-ISA

L-ISA technology, adopted by the most prestigious venues in the world, from Vegas to theme parks and concert halls, transforms traditional soundscapes by precisely positioning instruments in space, mimicking live concert settings. This innovation enhances music and sound, ensuring dynamic qualities and harmonious relationships of instruments are preserved for every listener.

Vocals become more intimate, and orchestras grander, creating spectacular auditory experiences. HYRISS integrates this technology, forming the foundation of its innovative audio tools.

Ambiance™

With the touch of a button, shift from a private cinema's crisp acoustics to the rich atmosphere of a concert hall. Ambiance immerses you in the perfect acoustic environment for recorded, broadcast, or live music.

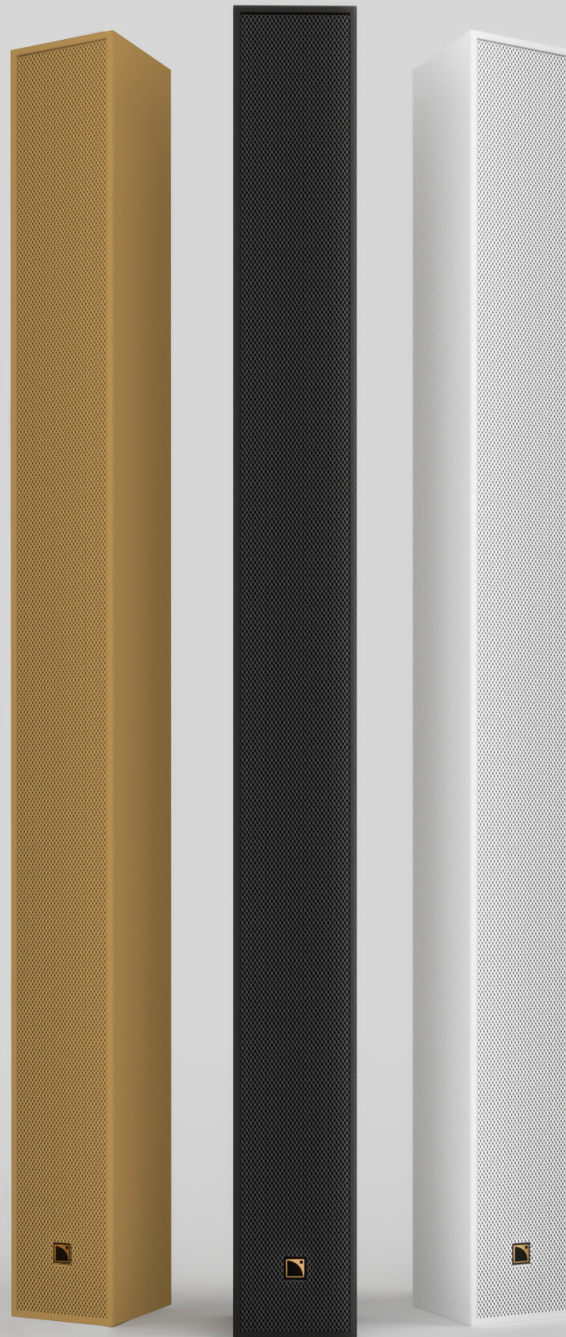

Elevate your auditory experience with Ambiance, part of HYRISS, where professional-grade acoustics meet convenience. Ambiance uses state-of-the-art sensing microphones, the advanced L-ISA II Processor, and dynamic HYRISS loudspeakers to transform any room's acoustics.

Anima™

HYRISS employs cutting-edge technologies to localize, spatialize, separate, and immerse audio content beyond its original intent, enabling you to position sounds with precision exactly where you want them within your space.

Anima, a suite of creative technologies within HYRISS, transforms ordinary sound and music into extraordinary experiences. Leveraging advanced algorithms and machine learning within the L-ISA II Processor, even the simplest tracks are elevated to thrilling concert-like experiences, making every listen feel premium.

Experience The Best Sound

Concert Quality Loudspeakers - The Power of a Concert Hall

Premium professional loudspeakers and subwoofers are installed seamlessly to provide the unmatched performance, clarity, and power of a live concert setting.

Electronics and Software - Precision Engineering with Power and Control

HYRISS is powered by high-performance L-Acoustics processed amplifiers and the revolutionary L-ISA II Processor. From the subtlest details to booming concert volumes, the system ensures crystal-clear sound with robust, professional-grade, distortion-free performance. Experience the same sophisticated sound technology used in the world's leading concert venues.

Customized Service - Tailored Solutions by Certified Experts

Each HYRISS installation is a masterpiece crafted by certified experts. We collaborate with you to define the desired experiences, operational conditions, and budget, ensuring a personalized solution. We guide the work of independent integrators in acoustics, room design, and technology to optimize each installation.

Enjoy elite-level service, the same as the world's top musical performers.

HYRISS

One Space. Endless Experiences.

Experience the future of sound with HYRISS. Superior audio technology and seamless design merge to create the ultimate auditory environment. From everyday living to grand entertaining,

HYRISS tailors every note to perfection, transforming your space into the most coveted place. Elevate your audio experience with HYRISS—the pinnacle of sound sophistication, designed to resonate with every aspect of your life.
